- the right to create any copies of the music that may be needed for training and competition purposes, also known as the 'mechanical rights'.

For a music to be fully cleared for these uses, these rights need to be cleared for each and every track used in each mix that contains a license (backed by a warranty and legal indemnity) for appropriate territory(s) that covers both the master rights of the recording artist and the publishing rights of each individual writer and composer of the track.

The titles, composers and orchestras of the music to be used for the Short Program and Free Skating Program for Single, for the Rhythm and Free Dance Program for Ice Dance must all be entered, in detail, by the ISU Member or the Skater(s) on the dedicated ISU platform. If music information is not complete and music not provided, accreditation will not be given.

During accreditation, all submitted music will be played to verify its accuracy. If any issues are identified, the Team Leader or Coach may be permitted to replace the file by providing a valid MP3 version on a USB stick, which will be reviewed by the Organizing Committee's Music Team.

The Planned Program Content must also be entered by the ISU Member or the Skater(s) on the dedicated ISU platform. In the jump sequence the second jump must be an Axel type jump with a direct step from the landing curve of the first jump into the take-off curve of the Axel jump. One full revolution on the ice between the jumps (free foot can touch the ice, but without weight transfer) keeps the element in the frame of the definition of a jump sequence. Jumps executed in a jump sequence receive their full value. An Euler (half-loop) when used in a jump combination or sequence between two listed jumps will be called but not considered as a listed jump and will not be counted in the number of the jumps of the concerned jump combination or sequence. After the Euler (half-loop) no change of foot is allowed. An Euler (half-loop) can only be executed once in the Free Skating. No triple or quadruple jumps are allowed. Difficult variation of a non-basic position is not counted as a feature in any spin; this will be ignored by the Technical Panel. The spin in one position without change of foot must have a minimum of six (6) revolutions, must be done in a basic position (camel, sit, layback or upright) and will be called maximum level basic. No level features are allowed in this spin. 8 revolutions can be done but will not count as an attempted feature. Flying entry is not allowed.

c) There must be a maximum of one (1) step sequence fully utilizing the ice surface and including at least one skating movement such as a spiral, spread eagle, Ina Bauer, hydroblading etc. If the skating movement is missing, no Level will be given. The Technical Panel will not award Feature 3) Use of body movements for at least 1/3 of the pattern and Feature 4) Two combinations of 3 difficult turns on different feet, and Feature 5) Body movements included in a combination of 3 difficult turns feature.

A spin that has no basic position with 2 revolutions will receive no value. Spin combinations must include a minimum of two (2) different basic positions with two (2) revolutions in each of these positions anywhere within the spin. To receive full value, a spin combination must include all three (3) basic positions. All spins with change of foot must have at least 3 revolutions on each foot. If these requirements are not fulfilled, the spin will be marked with a “V” to reduce the base value. Only features up to and including Level 2 will be counted. Any additional features will not count for level requirements and will be ignored by the Technical Panel. - A maximum of one (1) choreographic sequence, fully utilizing the ice surface.
